

Make FREE 223 Bullets

from

Fired .22 LR Cases!

Amazingly accurate!

Winning benchrest matches for over 45 years!

Easy on your barrel!

Thin jacket engraves easier than factory bullets, with less wear!

Makes 50-65 grain open tip flat base style

Standard 6-S ogive feeds reliably in semi-auto rifles.

Complete kits with everything you need...

1. KIT-224R

Use your standard RCBS-style single station reloading press with the RFJM-22R jacket maker, CS-1-R Core Seater, and PF-1-R point former. Make lead cores with the 4-cavity CM-4a adjustable core mold (.185-in). Comes with Corbin Swage Lube, HB-9e Instruction CD and DVD. \$974.⁵⁰ +shipping

2. KIT-224S

Use high precision Corbin CSP-1 S-press and benchrest quality FJFB-3-S die set with core swage, core seater and point former, rimfire jacket maker, swage lube, and CM-4a core mold. Over 300% faster than a reloading press. Everything you need including the press! \$1872.⁵⁰ +shipping.

Also available: 6mm kits for the same price (KIT-243R and KIT-243S). Same core mold works for both calibers, just add BSD-243R, or FJFB-3-S 243, and RFJM-6MR or -6MS jacket makers.
